

## Monthly Report – June

### Parks and Recreation

During June, both the Parks and Recreation (PNR) and Golf Course Maintenance departments were exceptionally active.

The PNR team underwent training, testing, and certification as Certified Pool Operators. They also managed equipment failures promptly, ensuring repairs were completed and routine maintenance remained on schedule.

At the aquatic center, contractors successfully addressed a cold joint issue stemming from the original construction. Plans are in place to plaster the pool during the second week of July.

At the airport, fuel pumps were temporarily offline due to low fuel levels. Staff swiftly arranged for refueling, restoring the fuel system promptly.

The GCM team was heavily engaged in leak repairs, aerification, fertilization, and routine maintenance throughout the month.
